© KonamiWhile FIFA may be by far the biggest game around, but you don't have to spend £40 to enjoy virtual football. In fact, fans are spoilt for choice with loads of soccer games available across PC, console and handheld devices, many of them for free. While some are inevitably more entertaining than others, there are plenty of gems that you can pick up without spending a penny. These 10 favourites offer potentially thousands of hours of enjoyment. In New Star Soccer, it's your job to take a created character to the peak of world footballer. The gameplay, which (on handheld devices) is focused on guiding passes and shots with precision, works in tandem with a text commentary system, and there are plenty of off-the-field activities to keep you busy, too. New Star Soccer has proved particularly popular on mobile and tablet in recent years, and the game underwent an impressive 3D graphics overhaul in 2016. If you're in two minds about whether to jump on the PES 2018 bandwagon, this is your best option. The free download, which is available on Xbox One, PS4, PS3 and Steam, allows players to spend an unlimited amount of time with the game's myClub, PESLeague, Training and Exhibition modes, although the latter is restricted to just a handful of teams. You're getting a lot of content for free here, including online and offline matches across various cups and division structures, as well as the ability to try out the game's all-new co-op features. This browser-based management game has been going for over two decades, and continues to be seen but, with its an absurdly in-depth and strategical gameplay engine, text sim fans will find themselves right at home with Hattrick. The ultimate goal is to build your club, manage resources and compete against other human managers online. In a shift away from most management-based games, Football Chairman focuses on the task of running a club as opposed to solely coaching a squad. The game, which is exclusively available for iOS and Android, allows you to build your own club, hire and fire staff, handle transfers and much more, with the goal being to rise through the divisions and reach the pinnacle of English football. There is a paid version offering additional features such as the ability to take over existing clubs, but there's more than enough to enjoy in the free version. The premise of Score! Hero is simple - you're an up-and-coming footballer, and it's your job to create and score goals for your team. It only requires a few swipes of the screen to accomplish this per-level, but as the game progresses, so too does its difficulty. The game is available for Android and iOS devices and features an engaging story complete with impressive graphics, and each gameplay scenario can be conquered with various tactical approaches. The only downside is how your energy drains upon failure, forcing you to wait a short time (or pay/watch ads) before playing again. The mobile version (Android, iOS) of FIFA is far from a replica of its console counterpart, incorporating a range of unique features. Ultimate Team is the obvious attraction here, but the big difference is that you can actually train your players, making it possible to turn a low-level acquisition into a top-rated superstar in time. Another great feature is VS Attack, which allows players to compete online in bitesized scenarios across 90-second games, with the potential to earn promotions and prizes along the way. Jumpers For Goalposts 5 is a popular Flash gameJumpers for Goalposts has long been known as one of the best football flash games on the web. It's ultimately very similar in nature to the aforementioned New Star Soccer, allowing players to live the life of a footballer, complete with off-the-field activities. The difference here is that instead of a footballer, complete with off-the-field activities. The difference here is that instead of a footballer, complete with off-the-field activities. The difference here is that instead of a footballer, complete with off-the-field activities. right direction. It's tougher than it sounds, and surprisingly addictive. Now in its eighth year, Top Eleven credits itself as being "the most popular online sports game in the world." Available for PC, mobile and tablet devices, the game allows you to build your own club and control everything from stadiums to transfers, as well as compete against players from across the world. The matches themselves are handled via a 2D engine which proves reminiscent of Football Manager, and you can even compete against cover star Jose Mourinho himself - just don't expect an easy challenge! If you don't own a console or powerful enough PC, or you simply want to take PES 2018 on the go, PES Mobile is worth a try. The game, which is available for Android and iOS devices, is surprisingly reminiscent of its console counterpart, allowing you to play with tailored gesture or classic controls across a variety of modes including myClub, Local League and UEFA Champions League events. There are a bunch of Legends up for grabs in the myClub mode, too, allowing you to acquire players such as Diego Maradona, David Beckham and Steven Gerrard. You can play Championship Manager 01/02 into a legally free download. The game, which arguably served as the series' peak before it acquired the Football Manager title, holds up extremely well to this day, despite sporting a text-only match interface. The game's fanbase has remained consistent over the years, too, with regular updates, graphics and challenges still being produced over at champman0102.co.uk. 17 years after its initial release, Champ Man 01/02 remains one of the best management games out there. Nothing's more annoying than trying to play your favorite mobile game and realizing you can't because you don't want to use the online features. That said, there are still plenty of free offline games that don't need Wi-Fi available on Android, iOS, PC, and Mac. Based on the wildly popular Fallout Shelter tasks players with protecting their own population of nuclear apocalypse survivors. Manage your resources wisely to help humanity thrive once again. Fans of games like Civilization and StarCraft will surely love this simulator. Badland is beautiful to look at and a blast to play. Players are tasked with helping a group of endearingly ugly critters navigate a dark forest full of deadly traps and puzzles. Although Badland is free for Android, a "Game of the Year" edition with mobile racing games. The eighth installment features 40 new tracks to tear up with dozens of new cars. Complete challenges to earn upgrades and customize your vehicle. You can race against the A.I. without an internet connection, but the online multiplayer mode is worth checking out since it lets you race against up to 12 opponents at once. Like Badland, Shadow Fight 2 has a distinctive art style that sets it apart from the competition. This one-on-one fighting game with RPG elements emphasizes strategy and fast reflexes over brute force. Players can choose from an array of weapons, or they can go into battle with only their bare fists. Infinity Loop was designed to help people unwind. The goal of this deceptively simple puzzle game is to create unique shapes by connecting dots. Since there's no timer, you can easily stop and resume gameplay at any time. If you like Infinity Loop, try Infinity Loop, tr after their initial release. If you haven't played it, PvZ is a creative twist on the tower defense genre in which players must defend their garden against an army of vegetarian zombies. Plants vs Zombies 2 is free to download for Android and iOS. Alto's Odyssey is a follow-up to the wildly successful Alto's Adventure, which reached more than 36 million downloads on Android alone. Instead of snowboarding, the titular character must now go sand-surfing through a vast desert. The excellent music and art style make Alto's Odyssey worth a look. Trivia games are always great for long car trips, social gatherings, or family fun nights. Quizoid offers different modes so you can play with a group of people or just test your own knowledge. When you download Quizoid for Android or iOS, the game stores all of the questions on your device, so you never need a Wi-Fi connection to play. Dream League Soccer isn't your average mobile sports game. It allows players to build their own leagues, teams, and stadiums to live out their booking fantasies. Choose from a cast of real-life FIFPro players to represent your brand, then test your own against the A.I. If you want to practice your poker game, but you don't have any cards, money or friends, Texas Holdem Offline Poker has you covered. While the game features an interactive tutorial for novices, the A.I. will give more experienced players a run for their money. Place virtual bets and participate in mock tournaments to polish your poker skills without risking your life's savings. Thanks for letting us know!
